

## **How to make you and your house as safe as possible**

If you want to make you and your house survive the hell of Hitler, then follow these simple steps to make you prepared for Hitler's attack. We will have no warning none of us will see it coming.

### **What to do when you hear the siren:**

Once the siren has gone off make sure you don't panic, then start to fast walk to either an air raid shelter or if your are closer to your house then go inside. If you have a Morison shelter or an Anderson shelter go inside MAKE SURE YOU REMEMBER YOUR GAS MASK! If you didn't manage to get to your house or to an air raid shelters NEVER STAY STANDING! Lay down either at your house (if you don't have a Morison shelter or Anderson shelter) or if you are out then lay down on the floor. If you are in a car then turn the lights off or turn your car off, if you are at home turn all your lights off and shut your curtains so the bombers don't know where the city or town is.

### **If there is a gas attack:**

If there is a gas attack A.R.P (air raid precaution) will walk around with a gas rattler if you heir it then put you gas mask on. If there is a gas attack and you have children make sure you put there's on first. Before the war has started make sure you have practised putting your gas mask on and off, make sure it fits.

### **Protecting your home:**

To stop your glass shattering all over you put either tape over your window you can also glue thin see throw curtains to catch the glass. If you have spare beams then put them up in your refuge room to keep it sturdier if the floor above falls down then it won't collapse on you. I'll tell you in a bit how to make your refuge room safe as possible. If you have a spare door then nail it up against a window on the outside and leave a gap between the window and fill

the gap up with sand or if you have a book shelf then put it against the inside of the window and fill it with books. If the siren goes off then turn the gas of in your house so it doesn't blow up if it catches on fire.

### **Making your refuge room as safe as possible:**

If you don't want to leave your home then you can make your own refuge room. First take all the glass stuff out so it doesn't shatter over you nail wooden or metal beams up so the roof doesn't fall down on you.

### **Shelters:**

Morison shelters are for people who don't want to leave your house. If you can't afford to buy one then you have to show that you can't afford to buy one and then you will get one for free. If you can afford to buy one then they are £7. You will have to build them or ask someone to build it for you. A Morison shelter is proven to stand the weight of a roof of a house. Anderson shelters are outside shelters for big families you need to have loads of clothes, blankets (to keep yourself warm), lots of food because you don't .
